

Anshika Jain

Software Engineer | AI & Data Systems | Full Stack Development
annshikaa16@gmail.com | +91 7566738902 | LinkedIn | GitHub | Portfolio

Technical Skills

Programming: Java, Python, JavaScript, TypeScript, SQL, C++
Core CS: Data Structures & Algorithms, Operating Systems, OOP, Memory Management
Backend & APIs: FastAPI, Spring Boot, Node.js, RESTful APIs, Scalable Microservices Architecture, Backend Optimization
Frontend: React.js, Next.js, Tailwind CSS, Frontend-Backend Integration
Databases: PostgreSQL, MySQL, MongoDB, Query Optimization, Indexing, Redis
Tools: Git, GitHub, Docker, Linux, Postman, API Testing, Debugging, Kafka
Cloud & DevOps: AWS (EC2, S3, IAM, Lambda), CI/CD, Deployment Pipelines
AI & Data: Machine Learning, Deep Learning, NLP, Data Engineering Pipelines, Model Evaluation, Benchmark Design

Education

Integrated M.Tech in Artificial Intelligence 2022 – 2027
Vellore Institute of Technology CGPA: 8.91/10
Class XII (89.4%, 2022) | **Class X (94%, 2020)**

Internship Experience

MERN Full Stack Developer Intern (AI Program) Nov 2025 – Dec 2025
Ethnus – Remote

- Built and deployed scalable REST APIs using Node.js, enabling reliable data flow for AI-integrated applications.
- Designed and optimized backend data pipelines and SQL queries, improving data retrieval efficiency by 25%.
- Built automated API evaluation workflows to benchmark system reliability and simulate real-world usage patterns.

Software Developer Intern (Trainee) Apr 2025 – Jun 2025
PixelNX Pvt. Ltd. – On-site

- Engineered multi-format data processing pipelines for an AI-driven SaaS platform, reducing end-to-end latency by 15–20%.
- Built enterprise-grade Spring Boot backend services covering authentication, transactions, and structured data workflows.
- Designed pipeline benchmarking mechanisms to identify performance bottlenecks and improve data ingestion efficiency.

Projects

Parampara Bazaar (Full Stack Platform with AI Negotiation Engine) – Java, React, PostgreSQL, Redis, AI March 2026

- Engineered a full-stack e-commerce platform with an AI negotiation engine that dynamically adjusts pricing on behavioral data.
- Iteratively evaluated and refined negotiation model decision logic using simulated user interaction datasets for accuracy.
- Integrated Redis caching and optimized backend queries, improving API response time by 25% under concurrent load.

ResumeSync-AI (AI-Powered Career Preparation Platform) – Java, Spring Boot, React.js, Python, AI Apr 2026

- Built an AI-driven resume tailoring engine that parses job descriptions and realigns resume content for ATS optimization.
- Developed ML pipeline for interview answer evaluation, scoring responses and generating structured improvement feedback.
- Engineered skill gap analysis, interview guidance, and cover letter modules via a full-stack Java-React interface.

StressSense-AI (AI-Based Stress Detection System) – NextJS, FastAPI, Python, Random Forest, ANN Jan 2026

- Designed and built a full ML data pipeline covering preprocessing, feature extraction, model training, and evaluation.
- Constructed high-quality labeled datasets and applied cross-validation and benchmarking to maximize prediction accuracy.
- Integrated the ML inference layer with a FastAPI backend and NextJS frontend through structured REST APIs.

Certicult Vault (Blockchain-Based Verification System) – Solidity, Spring Boot, React, IPFS Dec 2025

- Built a decentralized certificate verification system using Solidity smart contracts and IPFS for tamper-proof validation.
- Integrated MetaMask for on-chain authentication and Spring Boot for orchestrating backend verification workflows.
- Constructed repeatable test environments to validate smart contract logic and workflow reliability across edge cases.

FinLoan-AI (Full Stack Financial Analytics System) – Java, Spring Boot, PostgreSQL, Machine Learning July 2025

- Architected an ML-powered financial analytics platform with end-to-end data pipelines for real-time insight generation.
- Designed RESTful APIs managing structured data flow and communication between the ML inference layer and frontend.
- Benchmarked and optimized database schemas and query execution, reducing data retrieval latency by 20%.

Research & Publications

Deepfake Detection using Traditional Machine Learning and Deep Learning Techniques Published – ACIG Apr 2026
Prakriti Parakh: A Chatbot for Identifying Individual Prakriti –Under Review Aug 2025

Certifications

- Oracle Certified Foundations Associate – Oracle
- Applied Machine Learning – Coursera
- Cybersecurity Fundamentals – Cisco

Achievements

- Ranked in **Top 0.7% teams** globally at HP PowerLab 2.0, competing among thousands of participating teams worldwide.
- Selected as **Finalist at EY Hackathon 2026**, recognized among top teams for innovation and technical execution.
- Ranked in **Top 20 at Indradhanu Hackathon 2025** out of multiple competing teams across institutions.
- Solved **200+ DSA problems** across platforms and achieved **5-Star SQL** rating on HackerRank through consistent practice.
