

Technical Skills

Programming: C, C++, Python, Java, JavaScript, SQL
Core CS: Data Structures, Algorithms, Operating Systems, Memory Management, OOPs
Full Stack: React.js, Spring Boot, REST APIs, Backend Systems
Data & AI: Machine Learning, Deep Learning, NLP, Computer Vision, ETL Pipelines
Databases: PostgreSQL, MySQL, MongoDB, SQL Query Optimization
Tools: Git, GitHub, Docker, Linux, Postman

Education

Integrated M.Tech in Artificial Intelligence

Vellore Institute of Technology

2022 – 2027

CGPA: 8.89/10

Internship Experience

MERN Full Stack Developer Intern (AI Program)

Ethnus – Remote

Nov 2025 – Dec 2025

- Delivered 3+ data-driven MERN applications integrating REST APIs with backend pipelines for structured and scalable data flow.
- Refined backend services and streamlined database queries, improving data retrieval efficiency by 25% across modules.
- Incorporated AI and ML components to automate data processing and enable real-time insight generation.
- Collaborated with cross-functional teams of 4–6 members using Agile methodologies to deliver production-ready systems.

Software Developer Intern (Trainee)

PixelNX Pvt. Ltd. – On-site

Apr 2025 – Jun 2025

- Contributed to the development of “Syllables”, a SaaS-based AI platform supporting 4+ formats including eBooks, Audiobooks, and Podcasts.
- Built backend workflows for content transformation, processing multiple inputs per request using AI pipelines efficiently.
- Integrated APIs and modular services to enable scalable content generation across formats.
- Enhanced backend performance, reducing processing latency by 15–20% through refinement of data pipelines.

Projects

Parampara Bazaar - Full Stack E-Commerce Platform

Java, Spring Boot, React.js, PostgreSQL, C++

Jan 2026 – Present

- Developed a full-stack e-commerce platform supporting 350+ products across regional markets with effective product discovery capabilities.
- Built RESTful APIs using Spring Boot with structured PostgreSQL schemas for reliable handling of large-scale product data.
- Engineered an AI-driven negotiation module simulating real-world shopkeeper interactions using region-specific linguistic patterns.
- Enhanced backend performance and query execution through modular architecture and efficient data structures.

FinLoan-AI - Intelligent Investment & Expense Management System

Java, Maven, Spring Boot, React.js, PostgreSQL, Machine Learning

Sep 2025

- Crafted a financial analytics platform for expense tracking and portfolio monitoring, improving budgeting accuracy by 30% overall.
- Secured transaction workflows through REST APIs, enabling structured and reliable financial data analysis.
- Refined PostgreSQL schemas for financial datasets, reducing retrieval time by 20% through improved indexing and query design.
- Applied machine learning models to analyze spending patterns and generate meaningful and accurate predictive investment insights.

Certicult Vault - Blockchain Certificate Verification System

Solidity, Ganache, Truffle, Spring Boot, React.js, IPFS, MetaMask, AI

July 2025

- Developed Solidity-based smart contracts enabling tamper-proof verification for 100+ certificates on a decentralized blockchain network.
- Integrated IPFS (via Pinata) for off-chain storage, ensuring secure, distributed, and scalable handling of certificate data.
- Implemented MetaMask-based authentication and transaction signing for secure user identity verification and ownership validation.
- Applied AI-based OCR pipelines to extract and validate certificate metadata, improving verification accuracy and fraud detection.

Research & Publications

Prakriti Parakh: A Chatbot for Identifying Individual Prakriti

A Comparative Study of Classical Machine Learning and Deep Learning Techniques in Identifying Deepfakes

(Submitted)

Aug 2025

Apr 2025

Certifications

- Mastering DSA with C and C++ - Udemy
- Oracle Certified Foundations Associate – Oracle
- Applied Machine Learning – Coursera
- Cybersecurity Fundamentals – Cisco
- Full Stack Web Development Bootcamp - Angela Yu

Achievements

- Solved 300+ DSA problems across LeetCode and HackerRank focusing on arrays, trees, graphs, and DP Techniques.
- Completed 100 Days of DSA Challenge with consistent DSA practice.
- Earned 5-Star SQL Rating on HackerRank.
- Top 20 teams of Indradhanu Hackathon (International Grand Challenge, 2025)
